

ILIAS TZANIS

Igoumenitsa, 46100 | iliastzanis1@gmail.com | +30 6956001475

SUMMARY

Software Engineer with experience in conversational AI, application support, automation, and web development across enterprise and client-facing environments. Works with JavaScript, Bash, YAML, and Python to build application logic, support production systems, and improve delivery workflows. Holds an MSc in Big Data & Networked Systems and combines hands-on engineering with testing, troubleshooting, and cross-functional collaboration.

EXPERIENCE

Omilia

Remote

Software Engineer - Conversational AI Application Developer

March 2025 - Present

- Design and develop IVR applications for enterprise clients using Omilia's OCP platform.
- Implement application logic and complex call flows in JavaScript, covering business rules and dialogue management.
- Write and maintain Bash automation scripts for deployment, environment configuration, and operational workflows.
- Build and execute automated regression test suites using YAML-based CI/CD testing frameworks.
- Collaborate with clients and cross-functional teams to deliver production-ready conversational AI solutions.
- Provided on-site implementation support in Sydney for an Optus public sector conversational AI project in February 2026.

European Dynamics

Remote

IT Consultant & SL2 Support Engineer | SL2 Support | IT Consultant

June 2024 - March 2025

- Provided SL2 technical support and resolved incidents within defined SLAs.
- Monitored large-scale system health and performance metrics utilizing Grafana, proactively identifying bottlenecks and escalating critical bugs to reduce platform downtime.
- Analyzed system logs and application errors to troubleshoot underlying root causes, collaborating directly with Core Developers and Business Analysts.
- Managed and tracked technical incident lifecycles within ServiceNow, providing data-driven technical documentation to streamline future resolutions.

DonDigital.gr

Igoumenitsa, GR

Front-end Developer (Freelance)

April 2024 - June 2024

- Maintained and improved e-commerce websites using WordPress, WooCommerce, CSS, and JavaScript.
- Delivered UI improvements and plugin integrations to improve usability and client satisfaction.

.COM Business Computing

Igoumenitsa, GR

Web Developer & Technician

March 2023 - April 2024

- Managed client websites built on WordPress and provided hardware and software technical support.

EDUCATION

Ionian University

MSc, Big Data & Networked Systems

- Thesis: Bitcoin Price Prediction Using Deep Learning

Corfu, GR

Graduated February 2024

Ionian University

BSc, Informatics

- Thesis: Mapography Mobile Crowdsensing Application Demo

Corfu, GR

Graduated May 2022

SKILLS

Programming: JavaScript, Python, Bash, HTML, CSS.

Conversational AI: Omilia OCP Platform, IVR Design, Call-flow Development, Dialogue Management.

Testing and Automation: YAML Test Definitions, Regression Testing, CI/CD-oriented automation.

Support and Monitoring: Grafana, ServiceNow, Bugzilla.

Web and Tools: Git, WordPress, WooCommerce, GitHub, Gitlab, Atlassian Confluence.

Additional: Cursor IDE, Claude AI, Deep Learning, Big Data.

Languages: Greek (Native), English (Professional), German
