EXPERIENCE

Omilia

Remote

Software Engineer - Conversational AI Application Developer

March 2025 - Present

- Design and implement complex application logic and data flows for enterprise clients.
- Integrate external REST APIs, managing efficient request/response mapping and developing streaming data pipelines across distributed systems.
- Write and maintain Bash scripts to automate deployment workflows, data transformation steps, and routine environment configurations.
- Build, maintain, and execute automated test suites to ensure application stability, workflow reliability, and zero-downtime production releases.
- Analyze operational system data and collaborate with cross-functional engineering teams to troubleshoot infrastructure bottlenecks and optimize live systems.

European Dynamics

Remote

IT Consultant & SL2 Support

June 2024 - February 2025

- Monitored large-scale platform metrics, data health, and infrastructure performance.
- Conducted deep-dive analysis of application logs to debug software faults, identify system bottlenecks, and coordinate permanent hotfixes with development teams.
- Managed the full incident lifecycle within ServiceNow, ensuring strict SLA compliance and maintaining technical documentation to mitigate recurring system errors.

.COM Business Computing

Igoumenitsa, GR

Web Developer & Technician

March 2023 - April 2024

- Provided hardware, software, and systems support for corporate clients, resolving data management and network issues.
- Managed and updated client websites on WordPress/Joomla, including themes, plugins, and basic layout changes.

EDUCATION

Ionian University

Corfu, GR

MSc, Big Data & Networked Systems

Graduated February 2024

- **Thesis:** Bitcoin Price Prediction Using Deep Learning
- Developed and compared ARIMAX, SVM, and LSTM deep learning models; built end-to-end Python data pipelines for advanced time-series forecasting.

Ionian University

Corfu, GR

BSc, Informatics

Graduated May 2022

- **Thesis:** Mapography - Mobile Crowdsensing Application
- Engineered a full-stack collaborative mobile application demo using React Native (Expo) for the frontend and AWS Amplify for the cloud backend.

SKILLS

Programming & Scripting: JavaScript, Bash scripting, Python (Pandas, NumPy), HTML, CSS, SQL

Software & Application Development: REST API Integration, JSON/XML Mapping, Application Logic Design, Automated Testing, Agile Methodologies

IT Operations & Systems: SL2 Support, Incident Management (ServiceNow), Infrastructure Monitoring (Grafana), Log Analysis, Linux/Unix Environments

Tools & Platforms: Git, GitLab, GitHub, WordPress, AI-assisted development tools

Languages: Greek (Native), English (Professional), German
